

Support for Declaration on the Constitution

quantumiii fully supports the *Declaration Against the Injunction to Kill and in Defence of the Constitution we Must Live For*, which was recently initiated by Prof. Kader Asmal.

He drafted the *Declaration*, presumably in response to the recent statements by Mr Julius Malema of the ANC Youth League and Mr Zwelinzima Vavi of COSATU that they would be prepared to kill in the defence of the President of the ANC.

We agree specifically with the sentiment in the *Declaration* that:

"[...] Our Constitution is not a document only to be defended and protected by the judges of the Constitutional Court.

This significant moment in our history requires that all of us become activists in the service of our Constitution. Each of us must act as a steward, if not as an owner.

As citizens and friends of South Africa, in rejecting these inflammatory and dangerous attacks on the Constitution, we do not have to lay down our lives. We must live in defence of the Constitution, of its values and principles."
